

MCC SANAQ[®] UL-002

Microcrystalline Cellulose USP-NF, Ph. Eur.

Highly Compactible Binder

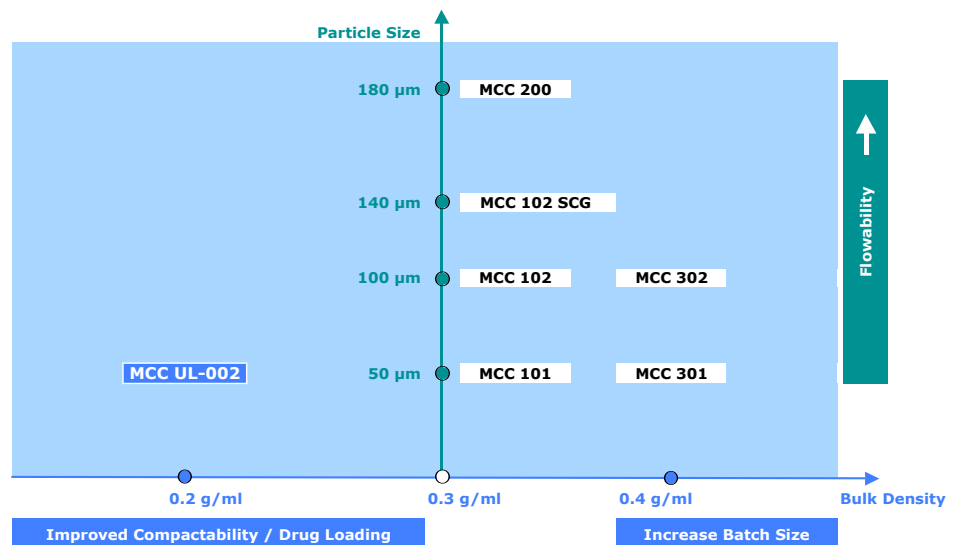

Microcrystalline Cellulose MCC SANAQ UL-002 is a purified and partially depolymerized α -cellulose.

This new type of Microcrystalline Cellulose has a very low bulk density and a different particle shape compared to other types of Microcrystalline Cellulose.

Characteristics

- Low Bulk Density
- High Compactability
- High Drug Loading Capacity

Applications

- Tablets with high drug loading
- Smaller size tablets
- Pressure-sensitive or low-compressible drugs
- Compression of drug loaded Pellets in tablets, less damage due to lower pressure
